Alfred Schillert complements Management Board of SCHWING Technologies Engineer is responsible for technology, production and services

2019 is a year to celebrate: SCHWING Technologies GmbH, headquartered in Neukirchen-Vluyn, Germany, takes a look back at its 50th anniversary. Managing director, Ewald Schwing, founded the company in Duisburg in 1969. And now, the equipment manufacturer is expanding its management. Alfred Schillert joined the management team on February 1, 2019 alongside founder Ewald Schwing and his son Thomas, who joined the company as managing director in 2006. Schillert, the graduate engineer, will immediately be responsible for the Technology, Production and Services Division of thermal cleaning expert SCHWING. Previously, the proven technology and marketing expert served as managing director of a technology service provider for over 30 NRW universities since 2001, specializing in innovation and IP management. Schillert has also served as the head of TechnologieAllianz, a German association for scientific advocacy, technology transfer and networking. At SCHWING, Schillert will steer the core areas of product development, digitization and development of new business segments. "Industry 4.0 is one of our major topics that we will continue to push", emphasizes Schillert, "as is the cooperation with universities. Internationally, we at SCHWING are already positioned excellently with 75 sales countries - this is something we must pursue and expand further".

SCHWING Technologies

SCHWING Technologies has been operating for 50 years and is the worldwide technological leader for high-temperature systems for thermal cleaning, thermo-chemical finishing and heat treatment of metal parts and tools. The owner-managed company designs, manufactures, and operates systems at its headquarters in Neukirchen-Vluyn in Germany's Lower Rhine region. Built upon the achievements of German engineering, the medium-sized business is globally the best-known specialist in the removal of plastics. Among SCHWING's approximate 2,500 international clients are companies from the plastics and fiber industries, as well as from the chemicals and automobile sectors. With its 80-strong personnel, the company is equipped with the tools and systems for any cleaning need and delivers the best economy, ecology, and quality. SCHWING is also a reliable service partner for contract cleaning by processing more than 250,000 tools and parts each year to the highest environmental and qualitative standards. So far, there has not been a single component that we have not been able to free from polymers and inorganic contaminants, confirm the three managing directors Ewald Schwing, Thomas Schwing and Alfred Schillert. Founded in 1969, the company celebrates its 50th anniversary in 2019 and opened SCHWING Technologies North America Inc., a new sales company in the USA, this year.
